

SOBERANES FIRE

CA-BEU-003422

OPERATIONAL PERIOD

TUESDAY JULY 27TH 0700 to WEDNESDAY JULY 28TH 0700

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: Soberanes	2. Operational Period: Date From: 7/27/16 Date To: 7/28/16 Time From: 0700 Time To: 0700								
3. Objective(s): Management Objectives									
 Provide for and maintain public and first responder safety by utilizing the incident safety analysis process. Protect all critical assets at risk to include the redwoods, historical assets within the affected area, infrastructure and improvements, watershed, and transmission lines. Utilize tactics that promote protection of sensitive natural and cultural resources in the Ventana Wilderness. It is the Unified Incident Commander's Leader's Intent to ensure collaboration at all levels of the incident. Be financially responsible for all management and fire suppression tactics. Foster and enhance community and political relationships. All management actions and efforts will be focused on serving, safeguarding and protecting the citizens and natural resources of Monterey County. Control Objectives Keep the fire North of the South Fork of the Little Sur River Keep the fire West of Carmel Valley Keep the fire East of Hwy 1 									
4. Operational Period Command Emphase Perimeter Control and Structure Defense.	is:								
General Situational Awareness Very Steep and rugged terrain. Dangerous re	ates of spread.

Soberanes Fire Weather Forecast

FORECAST NO: 4

NAME OF FIRE: Soberanes

PREDICTION FOR: 0700 Wed-0700 Thu

UNIT: CA-BEU/LPF

SHIFT DATE: 7/27-7/28

SIGNED:

TIME AND DATE

Incident Meteorologist- Ryan Walbrun **NWS-Bay Area**

FORECAST ISSUED: 1900 7/26/16

WEATHER DISCUSSION: Marine layer has compressed to around 500 feet which means it will have little or no influence on the fire area. Strong high pressure aloft will keep the marine layer shallow with hot and dry conditions over the burn area today. Winds will generally be light and slope driven in the drainages with light southwest winds aloft that will likely bring heavy smoke over the Carmel Valley helibase again today given the strong inversion layer. The hot and dry weather may lead to heat exhaustion as well as increased fire behavior with daytime highs in the 90s and humidity values into the single digits. There will not be much relief at night with the shallow marine layer keeping humidity values dangerously low with overnight low temperatures only in the 70s.

WEATHER FORECAST FOR Wednesday:

WEATHER: Areas of smoke...otherwise sunny and hot.

TEMPERATURES: 2-5 degrees warmer. 89-99 above 1000 feet. 69-78 along Hwv 1 in Div X/Z.

HUMIDITY: Afternoon minimums 12-19% above 1000 feet Branch I and II. 35-50% Div X/Z

20 FT WINDS:

RIDGETOP - Southwest 4-8 mph afternoon gusts 12 mph.

SLOPE/VALLEY - Becoming upcanyon 2-5 mph afternoon gusts 8-10 mph.

Marine Layer: Very shallow around 500-800 feet so only impacts will be along Hwy 1 over the fire.

WEATHER FORECAST FOR Wednesday Night:

WEATHER: Areas of smoke otherwise mostly clear. Mild and dry with low humidity.

TEMPERATURES: 2-5 degrees warmer. 68-77 above 1000 feet. 54-61 along Hwy 1 in Div X/Z.

HUMIDITY: Poor recovery 15-25% above 1000 feet except locally 9-15% after midnight

above 1500 feet. Good recovery 60-80% lower slopes Div X/Z along the coast.

20 FT WINDS:

RIDGETOP – South to Southwest 4-8 mph.

SLOPE/VALLEY – Evening upcanyons 2-5 mph...becoming light overnight.

Marine Layer: Shallow around 500 feet.

EXTENDED FORECAST: Continued hot and dry Thu-Fri. Marine layer 500-1000 feet. Light winds and strong inversion with heavy smoke impacts likely. Some cooling by the weekend.

SAFETY INFORMATION: Smoke will likely impact air operations. Know your elevation and monitor RH and temperature changes as the marine layer compresses. Please take wx obs. Portable RAWS 165.350 Tone 0031 for Bottchers Gap, Tone 0032 DP1, Tone 0034 Pinyon Peak, Tone 0035 White Rock.

WEATHER SUMMARY. HOT and DRY WEATHER WILL CONTINUE!!! PLEASE REVIEW INCIDENT METEOROLOGIST FORECAST

OUTPUTS

FIRE BEHAVIOR

GENERAL

The Central coast was affected more than most areas by drought over the last 6 years resulting in large amounts of dead, dying and diseased fuels. This combination of dead fuel loading and low relative humidly above the marine layer is challenging direct control methods. Smokey conditions will make it difficult to see the main fire and reaction time to escape routes must be planned accordingly. The fire is burning in a mix of brush, grass and with timber understory. A shallower marine layer will expose smoldering fuels that now will be receptive to burning. The fire has not been affected by any significant wind the last operational period but areas where the marine layer is mixing expect shifting erratic winds. Fire activity has been increasing the last two operational periods around 1700 this may be present again this operational period. Steep canyons with backing fire will have the potential for rollout and slope reversal. Probability of Ignition = 77%. Spotting Distance= 1/4 mile

Fine Dead Fuel Moisture = 3-5% Energy Release Component in the fire area are at 97th percentile levels or above.

SPECIFIC

BRANCH I

Divisions A. B. C. F

Rollout and slope reversal will continue to challenge direct fire control efforts. Hotter and drier weather will increase fire activity in this Branch. Smokey conditions or terrain may obscure view of the main fire use lookouts when possible. The most active fire has been around 1700 each previous operational period this may be earlier due to higher temps and shallow marine layer. This area will see a drop in RH after 2200 and active burning after midnight should be expected.

BRANCH II

Divisions G, H, I, J

The fire has had good consumption of timber litter and brush with moderate runs that have been fuel and slope driven. A high tree mortality rate will add to the number of fire weakened trees potentially cutting off escape routes. The marine layer should not impact Divisions in this branch and active burning should be expected through out the operational period. Look for an increase of fire activity around 1700 and again after midnight.

BRANCH III

Divisions K. M. P.

Hotter and dryer conditions will increase activity throughout the branch. Smokey conditions will shade light flashy fuels but look for activity to significantly increase if the inversion lifts and smoke disburses. Rollout and slope reversal may produce short durations of intense fire behavior. Active backing fire through out the Branch will bring down drought stressed trees and situational awareness is imperative. Indirect line construction must use lookout to know what the fire is doing at all times.

BRANCH IV

Divisions T.X.Z

Fire activity should be light in Divisions X and Z but a shallower marine layer may expose fire line that could be come active under hotter and dryer conditions. Division T may be active above the marine layer on Polo Colorado Rd. Look for drainages and areas of heavy fuel loading to become active above the marine layer.

AIR OPERATIONS:

- Smoke or fog could make visibility difficult through out the incident.
- Drops on to dead stands of trees could create rollout and widow makers in all divisions.
- · Look out shifting winds in canyons and draws.

SAFETY

- Indirect line must have lookouts that can see the main fire.
- Expect fire activity after midnight due to a drop in RH, monitor weather every hour.
- Dead trees could fall and cut off escape routes.

SAFETY MESSAGE SOBERANES

16-CA-BEU-003422 - July 27, 2016 - 0700 TO 0700

	·	
S F E T	HAZARD TREES and ROCKS Are a hazard on the incident – Near Serious Accidents Reported Watch Out Reports of trees falling in every division on the Soberanes Ground fire allows for rocks and boulders to dislodges Fire suppression, air drops and dozers dislodge rocks, logs and boulders Mitigation Keep your head and eyes up - Watch out in areas with steep slopes Develop and plan and brief your crew when working around trees Listen for rolling rocks and boulders and 'yell out' to others around you	E V E R Y O N E
S A F E T Y	FATIGUE Long Fireline Shifts and It's getting HOTTER and DRIER Watch Out Impacts situational awareness Impacts work performance Traveling within the incident Mitigation Look after and monitor one another Schedule work/rest cycle based on workload and weather, intake Water and Food Brief crews on the 204 Special Instructions	S R E S P O N
S A F E T	HEAVY EQUIPMENT Dozers and Masticators are Assigned To Multiple Divisions Watch Out Operators may have limited visibility Operations may cause rock and bolder roll out –Watch out! Maintain appropriate working distance Mitigation Make sure that you have eye contact with operator before you approach. Maintain high levels of situational awareness when working around heavy equipment	S B I L T Y

JACK PICCININI TEAM SAFETY OFFICER

Drive slowly on dusty and windy roads due to poor visibility

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N", on a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. You can get further information about Penal Code Section 409.5(d) at http://www.lecinfo.ca.gov/cgi-bin/displaycode?section=pen&group=00001-01000&file=403-420.1

CAL FIRE SOCIAL MEDIA POLICY – When on a CAL FIRE incident you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can get further information about the CAL FIRE Social Media Policy at http://calfireweb.fire.ca.gov/library/handbooks/0600/0691.pdf

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics. You can also send your photographs and videos to the following email Soberanesfire2016@gmail.com

LOST AND FOUND – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well.

MAIL SERVICE - The Information Section will assist you in getting items mailed from the incident as well as receiving items whether it is letters or packages.

TRAINING SPECIALIST MESSAGE

A Training Specialist is available for trainees on the incident

All federal, state and local government agency trainees working on position task books will need to register with the Incident Training Specialist in order to receive proper credit for your assignment. We are located with Check-In.

Bring your task book with you.

Training Specialist

CAL FIRE INCIDENT MANAGEMENT TEAM WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

Fireline personnel- (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- · Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc).
- Consider use of tertiary or treated water (sp)

Aviation Operations-

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

Private Water Supplies-

- · Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

Public/ Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.
- Make arrangements for reimbursement and damage claims if needed.

Management and Supervision-

- Use leaders intent and consider establishing Water Conservation as a Management Objective.
- Consider complexity of water use on incidents. Consider establishing a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- · Review this check list and brief daily.

Information:	

The intent of this document is intended to track, record and validated the amount of water used on a incident. It's not intended to review the performance of equipment using the water on an incident.

Archaeological and Historical Sites Fireline Guidance for the Soberanes Incident

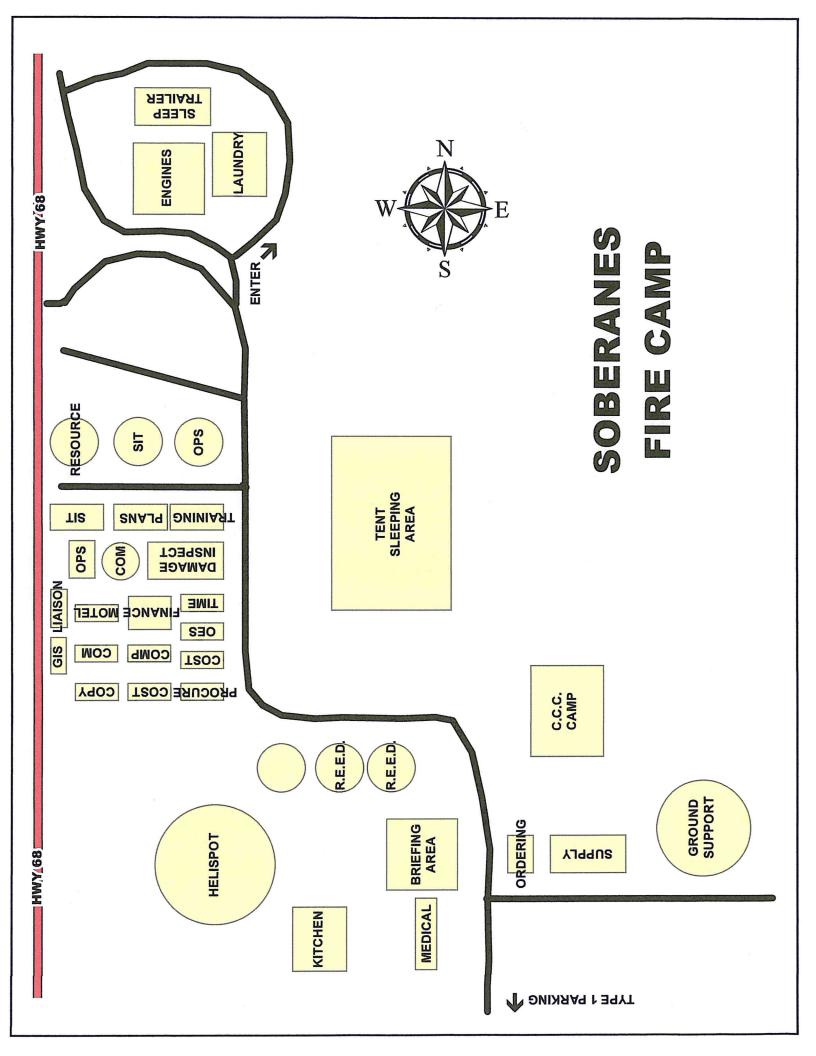

Do not compromise safety for the protection and preservation of archaeological and historical sites. When feasible and prudent:

- 1. Be on the lookout for prehistoric and historic sites. Prehistoric archaeological sites include temporary camps containing scatters of obsidian and/or chert flakes that often look like broken glass. More permanent village sites containing circular depressions (house pits), artifact scatters, and dark brownblack soils (midden). These typically occur on flats near sources of water, along ridgetops and saddles, and other such places suitable for camping. Historic sites include old wooden buildings, structures and corrals, rock foundations, wells, and debris scatters. These kinds of resources can be found in the same kinds of environmental settings as prehistoric camp sites.
- 2. No archaeological or historical sites have yet been flagged. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment.
- 3. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.
- 4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
- 5. When a site is discovered, flag it for visibility and report its location to the Division Supervisor. If feasible, note locations of discovered resources on a map. Better yet, take a GPS reading. Leave information with the Plans Section so that the sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.
- 6. If you encounter a burial or other human remains, cease work in that area immediately and contact the CAL FIRE Archaeologist. State law requires that CAL FIRE then contact the County Coroner, who will then determine if the remains are part of a crime scene. If the Coroner determines that the remains are Native American, State law requires the Coroner to contact the Native American Heritage Commission in Sacramento.

RESOURCE ADVISOR MESSAGE

SPECIAL INSTRUCTIONS FOR WILDERNESS DOZER LINES DIVISIONS K, M, & P

- ALL DOZER LINES IN WILDERNESS WILL BE REPAIRED/REHABILITATED LATER
- DOZER LINES WILL NOT EXCEED 50 FEET IN WIDTH except for safety reasons
- DO NOT PUSH BRUSH OFF STEEP HILLSIDES IT WILL BE SPREAD OVER THE LINE DURING REPAIR/REHAB
- MINIMIZE REMOVAL OF TOP SOIL IT WILL BE SPREAD BACK OVER THE LINE DURING REPAIR/REHAB
- AVOID RIPARIAN AREAS, SEEPS AND SPRINGS
